DETAILED ACTION

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 2/10/03 in Paper Nos: 19 and 20 has been entered. An action on the RCE follows.
2. Claims 5-10 are pending. Applicant has amended claim 9 and added claim 10. Claims 5-8 are withdrawn from further consideration because it is drawn to non-elected invention. Therefore claims 9 and 10 are under consideration.
3. The text of those sections of title 35, U. S. Code not included in this action can be found in the previous office action (Paper No: 11 and 13).

Claim Rejections - 35 USC § 103 withdrawn

4. Applicant's amendment to claim 9 has necessitated the withdrawal of the pending rejection as being unpatentable over Kruse et al. (1993) in view of Duschl (1995).
5. The following are new grounds of rejection necessitated by applicant's submission of a new claim.

Claim Rejections - 35 USC § 102

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical

Art Unit: 1647

Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

6. Claims 9 and 10 are rejected under 35 U.S.C. 102(e) as being anticipated by Greve et al. (U.S. Patent No: 6, 028, 176)

The applied reference has a common assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

The instant invention is directed to hIL-4 mutein proteins that have reduced affinity and/or an altered specificity to the γ subunit of the IL-4 receptor and/or HIL-13R α subunit of the hIL-4 receptor.

Greve et al. teaches production of the muteins of IL-4 I11A, K12A, N15A and N15D (Table 1). Reduced affinity and/or an altered specificity to the γ subunit of the IL-4 receptor and/or HIL-13R α subunit of the hIL-4 receptor is inherent to the mutations disclosed. It also discusses additional changes at positions 121 and 124 and its effect on the binding and specificity (see column 17 and 18). Therefore, the disclosure of Greve et al. anticipates claims 9 and 10.
